

There are two ways to update to the latest version of Zoom:

1. When you're not actively in a zoom meeting, click on the zoom icon in toolbar or start menu and get this "home" page. Click on the profile picture or initials in the top corner:

You get the following menu, which includes Check for updates.

2. Or you can go to <https://zoom.us/download>. (You want the first one listed: Zoom Client for Meetings. If you're using your phone to zoom, scroll down to Zoom Mobile Apps.)
